This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

ADDRESS.

In issuing this Volume of "Index to the British Catalogue," the Compiler takes the opportunity of expressing his regret for the unavoidable delay in its publication. His numerous engagements, indeed, have at times almost induced him to withdraw from the undertaking; but having found much valuable assistance in the engagement of Mr. Crestadoro, he has at length been enabled to bring his labours to a close. The Index, including Two Supplements, comprehends the publications of 1837 to the close of 1857; and, although sensible of its many defects, the Compiler has the satisfaction of believing that it will be found of considerable service.

It is necessary to explain that the main portion of the Index (1837 to 1855) does not refer to every book, but to such only as required to be collected under a given head: thus, for instance, individual Biography or Works of Fiction, unless embracing any special subject, will not be found in the Index, because that would be a mere repetition of the regular Alphabetical portion of the Catalogue.

There has always been an acknowledged difficulty in adopting a system of Classification: but in the Indices appended to the Catalogues of 1855 and 1856, a new mode was attempted, in following out the author's own definition of his book by presenting a Concordance of Titles. This attempt was found to combine many advantages, and has been generally approved of.

The Index for 1857 will be found to have made another step in advance, developing more fully the system henceforth to be adopted in the Annual Catalogues; and although the space allotted to each work is small, much information is compressed into that space — the reference number to the full title (to be found appended to the bi-monthly numbers of the Publishers' Circular, or to the Annual Catalogue) amply compensating for the previous brevity.

It is a source of gratification to the Compiler, in publishing this result of the labours of many years, that, whatever faults it may possess, he has at least laid the foundation for a more perfect and useful Catalogue, to be put forth at some future period either by himself or others.

47 Ludgate Hill: *July* 1858.

SAMPSON LOW'S
